

### 1. During the event:

- a. Make sure you know as much as possible about separating items
  - i. Ask for help, look it up, or use the ZWE signs
  - ii. When in doubt, put item aside until you get the right answer
- b. Know that dumpster diving is just part of the job
  - i. If something goes in the wrong bin, just switch it!
  - ii. Don't be scared of bad smells and bugs!
- c. Don't assume people know what items goes where
  - i. Educate them!
- d. Be proud of what you're doing!
- e. Bio-bags are often thin, so don't fill them too much

### 2. End of event:

- a. Do a final check of bins
- b. See if you can correct any mistakes
- c. Drop off trash to designated place if someone else wasn't responsible for that
- d. Give feedback to event leaders about day's waste

### 3. During the event:

- a. Make sure you know as much as possible about separating items
  - i. Ask for help, look it up, or use the ZWE signs
  - ii. When in doubt, put item aside until you get the right answer
- b. Know that dumpster diving is just part of the job
  - i. If something goes in the wrong bin, just switch it!
  - ii. Don't be scared of bad smells and bugs!
- c. Don't assume people know what items goes where
  - i. Educate them!
- d. Be proud of what you're doing!
- e. Bio-bags are often thin, so don't fill them too much

### 4. End of event:

- a. Do a final check of bins
- b. See if you can correct any mistakes
- c. Drop off trash to designated place if someone else wasn't responsible for that
- d. Give feedback to event leaders about day's waste

### 5. During the event:

- a. Make sure you know as much as possible about separating items
  - i. Ask for help, look it up, or use the ZWE signs
  - ii. When in doubt, put item aside until you get the right answer
- b. Know that dumpster diving is just part of the job
